Background:
AB 928, also called the Student Transfer Achievement Reform (STAR) Act of 2021, is a critical piece of legislation, introduced by Assemblymember Marc Berman, that strengthens the Associate Degree for Transfer (ADT), a landmark pathway that has promoted transfer access and success for over a decade at the California Community Colleges. Transfer is key to producing the workforce we need in California, particularly at this moment of financial uncertainty. Since the inception of the ADT, community colleges have conferred over 280,000 ADT degrees, ultimately streamlining transfer, saving costs, and guaranteeing access to our public universities. Although the state has made significant progress in transfer, persistent barriers remain in implementation of and access to the ADT. By faithfully implementing the Associate Degree for Transfer through AB 928, California stands to support thousands more students to achieve their college dreams.

Despite its benefits to students, the Associate Degree for Transfer is not the preferred transfer pathway for community college students. To limit costs, excess units, and time to degree, we need all community college students to start their college journeys on the ADT pathway.
