

CSU CHANNEL ISLANDS PROGRESS ON GI 2025 INITIATIVE

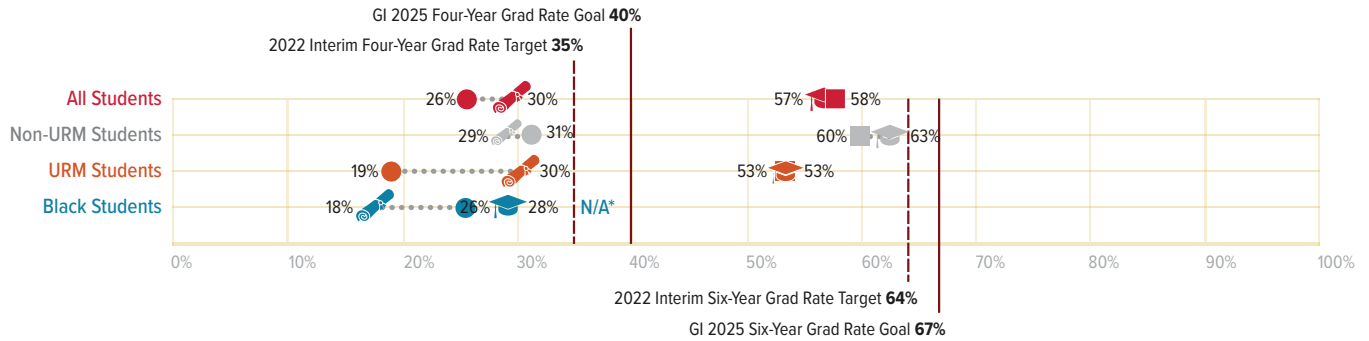

At CSU Channel Islands, the four-year graduation rate for all first-time students has increased from 26% to 30% and the six-year graduation rate has decreased from 58% to 57% since 2015. There is no gap between non-URM students and URM students after four years but that changes after six years, when non-URM students have a graduation rate that is 11 points higher than URM students. Gaps for Black students vary significantly from year to year, largely due to low sample sizes of Black students.

For transfer students, the two-year graduation rate has increased from 42% to 45% and the four-year graduation rate from 70% to 78%. URM students have slightly (three points) lower graduation rates after two years, but the gap disappears completely after four years.

Channel Islands has set two of their four campuswide goals for GI 2025 at rates below the systemwide goal. **The campus is currently on track to reach only one of its own GI 2025 goals, and one of the systemwide goals, although they had been on pace to hit a second systemwide goal as recently as 2021.**
