

CHICO STATE PROGRESS ON GI 2025 INITIATIVE

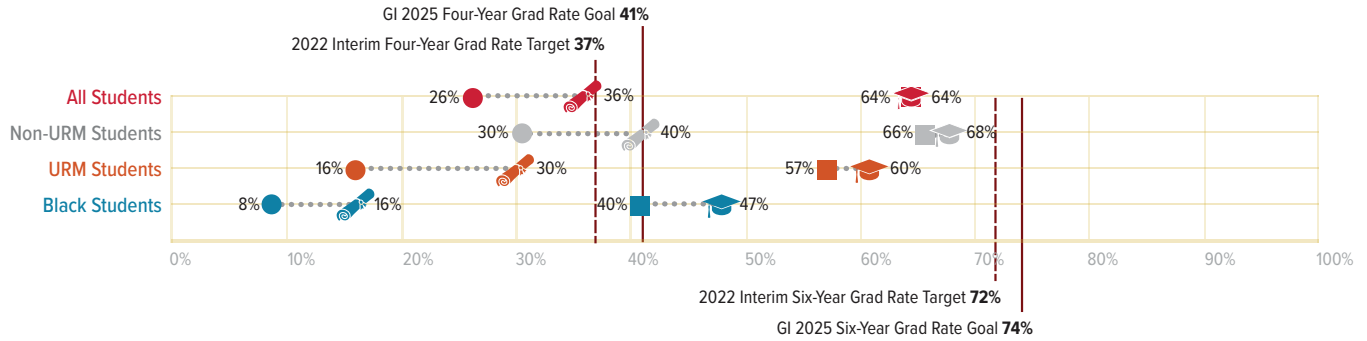

At CSU Chico State the four-year graduation rate for all first-time students has increased from 26% to 36% and the six-year graduation rate has remained flat at 64% since 2015 although it reached a high of 69% in the intervening years. However, there are significant gaps between non-URM students and URM students- whose graduation rates are 10 points lower after four years and nine points lower at the six-year mark. Those gaps are even more prevalent when comparing Black students to non-URM students at 14 points after four years and 19 points after six.

For transfer students, the two-year graduation rate has increased from 31% to 41% and the four-year graduation rate from 76% to 80%. URM students have slightly lower (by three points after two years and one point after four years) rates compared to non-URM students, and the gap between non-URM and Black transfer students is significant, at nine points after two years and eight points after four.

Chico has set three of their four campuswide goals for GI 2025 at rates above the systemwide goal. **The campus is currently on track to reach one of its own GI 2025 goals (but is within one percentage point of being on pace to hit a second, and two of the systemwide goals).**
