

## SONOMA STATE PROGRESS ON GI 2025 INITIATIVE

**At Sonoma State, the four-year graduation rate for all first-time students increased from 29% to 39% and the six-year graduation rate has increased from 59% to 60% since 2015, but reached as high as 63% in the intervening years.** Slight gaps persist between non-URM students and URM students- whose graduation rates are two points lower after four years and one point lower after six years. The gaps are starker when comparing Black students to non-URM students at 19 points lower after four years and four points lower after six.

**For transfer students, the two-year graduation rate has increased from 52% to 54% and the four-year graduation rate increased from 81% to 84%.** There is no gap between URM and non-URM students on either time interval, and there is an insufficient total of Black transfer students to draw conclusions from.

Sonoma has set all of its campuswide goals for GI 2025 at rates above the systemwide goals. **The campus is not on track to reach any of their own GI 2025 goals but is on track to hit three of the systemwide goals.**
